

New phase terminal for earthing equipment

The unique feature of the new terminal is the movable spindle with a swivel range of 20 degrees. With the aid of the spindle, lines are easily accessible, even from unfavourable inclines, as the clamp body with its wide contact surfaces is installed in the inclined position and fits closely to the line, - even if the case of a short-circuit.

The phase terminal size P1 covers conductor ranges of 4 to 20 mm; size 2 accommodates conductor ranges of 6 to 32 mm. Both versions are type approved to national and international standards DIN-VDE 0683-100 and IEC 61230.

THE POWER CONNECTION
